**SDVOSB and VOSB:** cleared 2026-06-12, active through 2029-06-11

## About the Founder

Dr. Renaldo Jones is the founder of Jonesies Solutions LLC. By day he serves as Senior Director, Engineering and Program Management at a large industrial enterprise in pipeline integrity services. Credentials include the Doctor of Strategic Leadership (DSL) from Liberty University, a Bachelor of Applied Physics, PROSCI Certified Change Practitioner, Project Management Professional (PMP), and United States Army combat veteran.

## Core Capabilities

- **AI workflow design for regulated environments.** Retrieval, oversight, and human review with the evidence trail federal reviewers require.
- **Multi-tool fluency across Claude, Copilot, and Gemini.** Vendor neutral. We match the model to the mission, not the agency to a stack.
- **Live prototyping that proves workflows before they ship.** Working prototypes inside 30 to 90 days replace slides with evidence.
- **Change management for federal AI adoption.** PROSCI ADKAR structures rollout so the workforce can operate the system after handoff.

## Core Differentiators

- **PROSCI Certified Change Practitioner.** Rare among AI vendors. Anchors the workforce side of every federal engagement.
- **Shipping multi-tool production product as proof of execution.** RACEprompt is live on iOS, macOS, and the web with paying users.
- **OMB M-25-22 alignment.** Engagements avoid vendor lock-in, prefer interoperable solutions, and document model and data choices.

## Shipping Products

- **RACEprompt** (Jonesies Solutions LLC). Multi-model AI prompt builder. Live on iOS, macOS, and web; Android in beta.
- **QuietPulse** (Jonesies Solutions LLC). Free stress regulation app for iOS and Apple Watch.
- **F3** (owned by Jada Sullivan, partner). Habit and accountability app. Jonesies Solutions LLC contributes engineering and production.

## Engagement Vehicle

**\$11,999 fixed-price Pilot** (micropurchase eligible at the FY26 threshold). **\$14,999 recommended bundle** adds VA-specific prompt templates. Larger engagements via simplified acquisition or VAAR 819.7008 SDVOSB sole-source up to \$5M.
